PROFESSIONAL SUMMARY

MBA candidate and Business Analyst Intern with strong analytical, logical reasoning, and problem-solving skills, seeking to build expertise in Oracle Transportation Management (OTM), Supply Chain, ERP, and enterprise consulting. Hands-on experience in requirement gathering (BRD, FRD, User Stories), solution design, functional specification and technical documentation, UAT, data validation, and SQL-based data analysis, with working knowledge of databases, APIs, and XML/JSON integration concepts. Practical exposure to Generative AI tools (ChatGPT, Claude, Microsoft Copilot, Gemini), prompt engineering, and AI-assisted coding, testing, and documentation. Strong communicator, quick learner, and adaptable to enterprise application environments.

EDUCATION

Sinhgad Business School, Savitribai Phule Pune University <i>MBA (Marketing Management)</i>	2024 – 2026 <i>Pune, India</i>
K.K. Wagh Arts, Science & Commerce College <i>Bachelor of Commerce (B.Com)</i>	2021 – 2024 <i>Nashik, India</i>

EXPERIENCE

Business Analyst Intern <i>Ws2epL Pvt. Ltd.</i>	Aug 2025 – Jan 2026 <i>Nashik, India</i>
- Assisted in end-to-end requirement gathering, solution design, configuration, and deployment activities by engaging with stakeholders and documenting 15+ BRDs/FRDs and 30+ user stories with clear acceptance criteria, reducing scope ambiguity and development rework. - Prepared functional specifications, technical documentation, and user guides to support development, testing, and knowledge transfer across project teams. - Participated in system integration, data validation, and User Acceptance Testing (UAT) cycles, developing 25+ SQL queries (JOINS, CTEs, Window Functions, CASE statements) to extract, clean, and validate data accuracy across datasets exceeding 10,000 records. - Supported production reporting issues, incident resolution, and enhancement requests by troubleshooting data discrepancies and coordinating fixes with technical teams. - Designed and built 4 interactive Power BI dashboards with DAX measures, KPI cards, slicers, and drill-through functionality to track operational KPIs, improving reporting turnaround by 25%. - Collaborated with business users, technical teams, and cross-functional project stakeholders using Jira for task tracking and sprint management across 8 sprints in an Agile/Scrum delivery framework. - Leveraged Generative AI tools (ChatGPT, Claude) with prompt engineering techniques for AI-assisted documentation, query optimization, and testing support, applying responsible and ethical AI usage practices in line with data privacy considerations. - Automated 6 recurring reports using Power Query, Pivot Tables, XLOOKUP, INDEX-MATCH, and Conditional Formatting, reducing manual processing time from 4 hours to under 1.5 hours per cycle and improving data accuracy. - Conducted process analysis and root cause investigation of reporting gaps, presenting data-driven recommendations that improved reporting efficiency and were adopted by the business team.	

PROJECTS

Netflix Content Portfolio Analysis <i>SQL Server, Advanced SQL, Python, AI Tools</i> GitHub
- Designed and executed a complete end-to-end SQL-based business analysis of Netflix's Movies & TV Shows catalog (8,000+ titles across 190+ countries), building the full analytical pipeline from database creation and data loading through cleaning, exploratory data analysis, and business analysis. - Applied advanced SQL techniques (CTEs, Window Functions – LAG, ROW_NUMBER, RANK, DENSE_RANK, STRING_SPLIT, CROSS APPLY) to query, validate, and structure large relational datasets for downstream decision-making. - Used Python and Generative AI tools (ChatGPT, Claude) to support data cleaning, query optimization, and accelerate insight generation and technical documentation. - Identified portfolio imbalances and delivered strategic, data-backed recommendations on content investment priorities, converting technical SQL outputs into actionable business insights.

TECHNICAL & FUNCTIONAL SKILLS

Enterprise Apps & Domain: Enterprise Applications (exposure), ERP concepts, Supply Chain & Logistics fundamentals, Business Process Analysis, Techno-Functional Consulting fundamentals
Databases & Integration: SQL (Advanced), Databases, Python, DAX, APIs, XML, JSON (integration concepts – familiar)
Implementation Lifecycle: Requirement Gathering (BRD, FRD, User Stories), Solution Design, Configuration, System Integration, Data Validation, UAT, Incident Resolution, Functional & Technical Documentation
BI & Reporting Tools: Power BI, DAX, Advanced Excel (Power Query, Pivot Tables, XLOOKUP), Data Visualization
Project & Collaboration Tools: Jira, Confluence, Agile/Scrum, SDLC
Generative AI & Automation: ChatGPT, Claude, Microsoft Copilot, Gemini, Prompt Engineering, AI-Assisted Coding/Debugging/Testing/Documentation, AI Ethics & Responsible AI, Automation, Low-Code/No-Code Platforms (familiar)
Core Competencies: Analytical & Logical Reasoning, Problem Solving, Stakeholder Communication, Change Management, Cross-Functional Collaboration

CERTIFICATIONS

Advanced Microsoft Excel Certification • Power BI Fundamentals • Business Analytics Fundamentals
